

At June 15, 2016 the often used weather site **weather noaa gov** will cease to function

Read here: <http://www.wxforum.net/index.php?topic=29502.msg289367>

Leuven Template version 2.4 2.5 2.6 and 2.7

script **metar/metarGetConditions.php** (= adapted Saratoga version)

Check lines 130-131, line-numbers can be different based on the version of the script.

Read now:

```
$host = 'weather.noaa.gov';  
$path = '/pub/data/observations/metar/stations/';
```

Change to:

```
$host = 'tgftp.nws.noaa.gov'; # 'weather.noaa.gov';  
$path = '/data/observations/metar/stations/'; # '/pub/data/observations/metar/stations/';
```

Leuven Template version 2.8:

script **metar/wsMetarTxt.php**

line 46 reads now:

```
$metarURL = 'http://weather.noaa.gov/pub/data/observations/metar/stations/'. $icao.'.TXT';
```

change to

```
$metarURL = 'http://tgftp.nws.noaa.gov/data/observations/metar/stations/'. $icao.'.TXT';
```
